

Research Advisory

Supporting and promoting innovative research and encouraging its implementation for safe, sustainable and cost-effective transportation solutions that keep Michigan moving.

Contract Extensions

The Research Administration (RAd) is no longer able to extend contracts after they have expired. For this reason, research Project Managers should start any extension process well in advance of the project end date. RAd recommends initiating project extensions at least 45 days prior to the project end date.

If a project ends prior to a needed extension, the contract will need to be renewed and amended rather than extended. Any expenses incurred between the contract end date and the renewal date will not be eligible for research funding.

For more information on the extension process please refer to section 3-19 of the [Research and Implementation Manual](#).

If you have any questions please contact RAd at mdot-research@michigan.gov.
